Ph.D. student in Computer Science at Northeastern University. I build **health AI** systems that combine **wearable passive sensing** with **LLM-based conversational agents**, helping people capture, understand, and reflect on **stress** and well-being in everyday life.

Experience

Sep 2024 – present **Graduate Research Assistant** • UbiWell Lab, Northeastern University

- Built **StressTalk** end to end: an **LLM-based conversational agent** for daily stress check-ins, a **multi-agent sensemaking pipeline** that infers the context of **wearable-detected stress episodes**, a **native iOS app (Swift)**, and a **Python/Flask + MongoDB** backend.
- Ran a **6-week, 21-participant** within-subjects field deployment against **EMA**: **82%** of stressful reports came from sensing-triggered questions, and **15 of 21** participants preferred StressTalk for long-term self-reporting.
- Interviewed **6 domain experts**, showing that conversational self-reports read alongside sensing data clarify stressors and changing appraisals.
- Building **wearable and voice-assistant** support for caregiver stress, funded by the NIH AI-CARING Institute (demo video).

Jul – Nov 2025 **Applied Scientist Intern** • Amazon, Search Experience Science Group

- Co-authored a **40-participant study** testing whether **LLM-agent digital twins** of real shoppers can evaluate an agentic shopping assistant in their place [P2].
- Built an end-to-end testbed for an **LLM-based conversational shopping assistant** in the **WebArena** simulated e-commerce environment, enabling controlled studies of assistant behavior.
- Translated HCI theories of **consumer decision making** and conversational interaction into concrete **conversation strategies** for the assistant.

Education

Sep 2024 – present **Ph.D., Computer Science** • *Northeastern University*
Advisor: Varun Mishra

Sep 2022 – Jul 2024 **M.Phil., Computational Media and Arts** • *The Hong Kong University of Science and Technology*
Advisor: Mingming Fan

Sep 2017 – Jun 2022 **B.A., Russian Language and Literature** • *Zhejiang University*

Skills

Research	HCI, Ubiquitous Computing, Passive Sensing, Health AI, EMA, Mixed Methods
ML / AI	LLM Agents, Multi-Agent Systems, Conversational Agents, Statistical Modeling
Engineering	Python, Swift (iOS), R, Flask, MongoDB
Design	UX Research, Prototyping, Usability Testing
